

Artin Zarghami

RÉSUMÉ

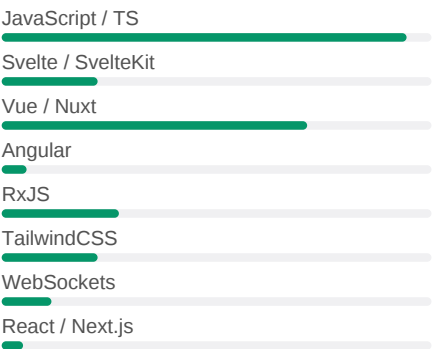

Frontend-Focused Full-Stack Developer · JavaScript & TypeScript

contact@artindev.ir +98 936 461 0252 github.com/dev-zarghami linkedin.com/in/dev-zarghami

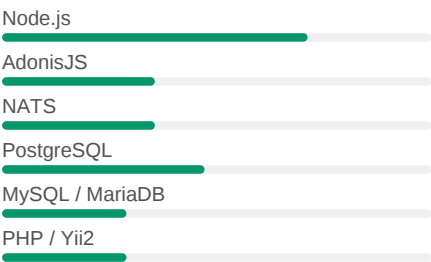

I build fast, polished products end to end. On the frontend I craft reactive interfaces across the JavaScript ecosystem — React, Vue and Svelte with their meta-frameworks — shipping SPA, SSR and SSG apps and extending them to mobile with Capacitor. On the backend I design clean, event-driven APIs with Node.js, NestJS and AdonisJS — work that powers high-traffic crypto and fintech platforms used by thousands of people every day.

01 SKILLS

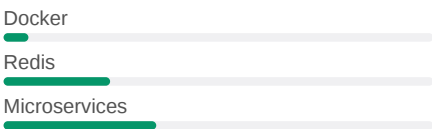

Frontend

Backend

DevOps

02 EXPERIENCE

Jun 2026 – Present

Senior Frontend Developer

Bidarz

Dec 2025 – Jun 2026

Senior Frontend Developer

OMPFInex

- Developed and scaled critical frontend features using Angular and TypeScript.
- Optimized complex asynchronous data streams and state flows via RxJS, improving UI stability and handling high-frequency market updates.
- Enhanced performance across critical user journeys including order management, wallet interactions, and real-time charting.

Nov 2024 – Dec 2025

Senior Frontend Developer

Kebrin Exchange

- Architecture & Refactoring: Migrated and rebuilt legacy frontend codebases into modular, reactive components using Svelte, TypeScript, and RxJS, significantly cutting bundle size and boosting runtime speed.
- Rebranding Execution: Spearheaded the implementation of the new design system and responsive UI across the exchange using Tailwind CSS.
- State & Data Streams: Streamlined complex asynchronous state and live data flows via RxJS, ensuring seamless real-time trading and wallet interactions.
- Cross-Functional Collaboration: Partnered with product managers and designers to optimize critical user journeys, accessibility, and overall platform responsiveness.

● **Oct 2023 – Nov 2024**

Frontend Developer (Svelte, RxJS, Tailwind CSS)

Erythron Exchange

- Engineered reactive and lightweight client interfaces leveraging Svelte and Tailwind CSS.
- Handled real-time order-book updates, charts, and asynchronous UI states with RxJS.
- Integrated financial APIs and WebSockets, ensuring seamless data synchronization between frontend clients and trading engines.
- Maintained clean code conventions, component reusability, and front-end performance benchmarks.

● **Mar 2020 – Sep 2023**

Frontend-Focused Full-Stack Developer

HamtaPay

- Distributed Architecture: Integrated NATS message broker to enable decoupled, asynchronous event-driven communication across internal backend services.
- Backend Engineering: Architected and maintained RESTful APIs and business logic for trading and payment operations using Node.js, AdonisJS, and PostgreSQL.
- Reactive Client Applications: Built and maintained dynamic, SSR/PWA frontend portals and user dashboards using Vue.js and Nuxt.js.
- Data Integrity & Scalability: Designed relational schemas, optimized complex SQL queries in PostgreSQL, and ensured safe handling of high-concurrency financial transactions.
- Product Delivery: Collaborated with cross-functional teams to ship secure, compliant, and responsive features for crypto deposit, withdrawal, and spot exchange workflows.

● **Jun 2020 – Aug 2020**

Freelance Frontend Developer

Naranj

- Developed scalable, server-rendered platforms leveraging Vue.js and Nuxt.js to maximize page-load performance and organic discoverability.
- Crafted adaptive, mobile-first user interfaces focusing on accessibility and seamless cross-platform user experience.
- Integrated third-party services and backend RESTful APIs into clean, reactive frontend components.
- Maintained modular architecture and clean code standards for smooth handover and long-term project maintenance.

● **Jun 2019 – Jul 2019**

Co-Founder & Full Stack Developer

Shopista

- Architected full-stack web applications using Vue.js/Nuxt.js for reactive merchant portals and Node.js & PHP (Yii2) for backend APIs.
- Implemented end-to-end commerce features including automated catalog syncing, order tracking, and mobile-first storefronts.
- Oversaw infrastructure setup, database schema design, and server deployments.
- Translated user feedback into technical roadmaps, navigating rapid prototyping and product-market validation cycles.

● **Mar 2017 – Jun 2019**

Backend & Frontend Developer

Navosh Arya

- Developed backend architectures, relational schemas, and RESTful APIs utilizing PHP, Yii2, and MySQL.
- Led frontend initiatives using Vue.js and Nuxt.js, delivering responsive, interactive user dashboards and client portals.
- Streamlined frontend-backend data contracts, improving integration speed and client-side error handling.
- Maintained clean code standards, database query optimizations, and cross-browser UI consistency.

● **Sep 2016 – Mar 2017**

SEO Intern

Onliner

- Optimized websites for search engines, improving page structure, content accessibility, and organic crawlability.
- Supported web development tasks, updating site features and scripts utilizing PHP, JavaScript, HTML, and CSS.
- Analyzed user engagement metrics and keyword performance using digital analytics platforms.
- Built a strong, holistic foundation in web standards, performance, and real-world project workflows.

03 PROJECTS

Bidarz Exchange

Senior Frontend Developer

Full web experience for the Bidarz crypto exchange — the RTL trading platform, the public vitrin with a live market ticker and instant-swap calculator, and the Bidarz crypto magazine — built with React.js and Next.js.

Jun 2026 – Present

bidarz.ir

React.js

Next.js

JavaScript

TypeScript

Kebrin Exchange

Front-End Team Lead & Developer

Complete frontend redevelopment, re-branding and architectural migration of a crypto exchange platform — a performant SvelteKit app with reactive RxJS data feeds and the TradingView charting library.

Nov 2023 – Oct 2025
